

30% Lower Cost

With The Power You Demand

The WATER LESS® battery from HAWKER gives you the power you need and saves you money.

Battery watering can be 40% or more of the cost of owning and operating a motive power battery. HAWKER's WATER LESS battery can reduce watering expenses by over 90% – lowering your total cost of ownership more than 30%.

Compared to so called "maintenance-free batteries", you'll cut total ownership costs by more than half.

Look at other WATER LESS advantages:

- Full capacity ratings.
- Flooded design/longevity.
- No special chargers required.
- Requires watering just four to six times per year in standard applications*.
- Proven performance.
